

Christmas Display

There is a wealth of Christmas resources at Play Resource, we hope the following ideas will inspire you to create your own displays for Christmas!

You will need

- Length of wallpaper and tan fabric
- Detailed instructions for the individual parts of our display - tree, blazing fire, winter snow scene and other decorations will be given on the following pages
- Staple Gun

To create an atmosphere of warmth and welcome we used a blazing fire as the center piece of our display contrasting it with the snow scene beyond the window. The brightly decorated tree festooned with presents holds a promise of fun and celebration for Christmas Day!

Display

1. Staple a length of tan fabric to the lower part of the display board and a length of wallpaper to the upper to create the backdrop for the living room.
2. We stapled the fireplace to the centre of the display adding the mirror above and positioning the Christmas tree and snow scene either side.
3. Attach gift wrapped boxes to the base of the tree using push pins. Add individual decorations to the tree and finish off with an eye catching set of fairy lights (battery operated).
