

Paper Candle

You will need

Gold packaging card/foil
Sellotape
Scissors
Thread

Take a length of gold or silver card and wrap it around a small tube.

Cut out a rectangle of card/foil - the same height as the tube and long enough to wrap around it. Score a line along the centre of the card and fold it before cutting slits at regular intervals the from the (folded) edge

Enlarge the diagram A to make a holder to fit the base of the tube of you have chosen.

Cut out a circle to fit the tube and remove the centre. Attach a small flame cut from paper of card and attach it by a thread to the circle.

Cut two slits either side of the top of the tube and slot in the circle.

Make variations of this craft idea by using different sized tubes ranging from toilet roll tubes, biscuit tubes to heavy cardboard tubes. Use tissue to back off the circle. Card for the holder will produce a structured effect paper or foil will produce a much softer effect.
