Little Bat

You will need

- Chenille pipe cleaners
- 6" tissue squares x 2
- PVA glue
- Coloured chalk
- Scissors

1. Make a little bat simply by using two chenille pipe cleaners formed into the shape of bat wings. Twist a pipe cleaner roughly into a body shape and join each wing either side.

2. Apply glue generously to one side of two 6" tissue squares and cover the wings.

3. Once the glue has dried trim off the surplus tissue around the wings.

4. Chalk a crescent moon onto the backdrop (as described on page 1) and attach the little bat.
