

Concertina Skeleton

Template for skeleton

You will need

Card or heavy paper for head, arms and legs

Thin paper for the body

Scissors

Black felt tip

This is a very easy skeleton to make. Photocopy and enlarge 40%. Cut out all the pieces from the template. Follow the instructions for the body part which is cut from paper that is not too stiff to allow the V shape to be cut through all of the layers of the folds forming the concertina body.

Cut out a strip of paper about 30.5cm x 10cm for the body. Fold along the dashed line at approx 2.5cm intervals. Once the paper is folded cut a long V shape between the lines. The head, arms and legs can be cut from light card or cartridge paper.

Join the pieces together with butterfly clips.
