

'Create...Polycube Robot'

You will need:

- **Polycubes**
- **Wooden skewers**
- **Shimmer pipe cleaners**
- **Silver Spray/Paint**
- **Paper clip**
- **Screws & Paper Fasteners**
- **Google eyes**

Instructions:

1. Carefully pierce large Polycube with two half skewers to make the legs. Thread on the smaller cubes finishing with a larger one for the foot.
2. Push a 5cm skewer into the top of the body and secure a medium Polycube on top. Spray or paint the body silver.
3. To make the arms curl the pipe cleaners round a pencil and pierce into the side of the body. Cut out two silver hands and attach to the pipe cleaners.
4. For the features push the screws into the side of the head .Stick the paper clip on for the mouth .Push the paper fasteners into the head for the eyes and stick the google eyes on top. Bend a pipe cleaner for the antenna and push it into the top of the head .Finally stick bubble wrap on the tummy.
